OBJECTIVE

B.Tech Computer Science and Engineering student specializing in AI & ML with a 9.30/10 CGPA and strong foundations in Java, Python, data structures, algorithms, and object-oriented programming. Experienced in developing software and machine learning applications through internships and projects. Passionate about solving complex problems and building reliable, scalable software systems.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML) | Uttaranchal University **2024-present**

Focused on AI/ML, Data Structures & Algorithms, and Software Development with hands-on project experience.

Intermediate (MPC) | Government Junior College **2022-2024**

Focused on Mathematics, Physics, and Chemistry, developing strong analytical and problem-solving skills.

EXPERIENCE

Machine Learning Intern | CodeAlpha — Remote **Jul 2026-Aug 2026**

Developed three machine learning projects: **Disease Prediction, Credit Scoring Model, and Handwritten Character Recognition**. Applied data preprocessing, feature engineering, model training, evaluation, and predictive analytics using **Python, Scikit-learn, Pandas, NumPy, and OpenCV**.

Artificial Intelligence Intern | EduExpose — Remote **Jun 2025-jul 2025**

Developed a **Real-Time Object Detection System** using Python and OpenCV. Applied Artificial Intelligence, Computer Vision, and image-processing techniques to perform live object detection and real-time recognition.

PROJECTS

CardioVision AI | Machine Learning

• Developed a heart disease risk prediction application using Python and Scikit-learn, integrating a Random Forest classification model with an interactive Streamlit dashboard.

• Implemented data preprocessing, model inference, and medical data visualization using Pandas and NumPy.

• Built an interactive interface to accept patient health metrics and display model-generated predictions.

Raktha-Sethu | Full-Stack Development

• Developed a blood donation platform connecting blood donors and recipients through blood group compatibility and location-based matching.
• Designed database workflows for donor profiles, blood requests, and blood bank inventory using Python, Flask, and MySQL.
• Implemented responsive web interfaces and emergency blood request workflows using HTML, CSS, and JavaScript.

SKILLS

Programming: Java, Python, SQL, JavaScript
Web: HTML, CSS, JavaScript, Flask
Database: MySQL
Tools: Git, GitHub, VS Code
Core CS: DSA, DBMS, OOP, Operating Systems
AI/ML: Machine Learning, Artificial Intelligence, Scikit-learn, TensorFlow, OpenCV

ACTIVITIES AND ACHIEVEMENTS

- Solved 600**+ Data Structures & Algorithms problems** on competitive programming platforms.
- Completed **2 industry internships** in Machine Learning and Artificial Intelligence.
- Built multiple real-world **AI, Machine Learning, Computer Vision, and Full Stack projects**.
- Maintained a strong academic record with **9.30/10 CGPA**.
- Active competitive programmer on **LeetCode and HackerRank**.
- Earned **HackerRank Software Engineer Intern** and **Problem Solving (Intermediate)** certifications.
